NOTE

From: General Secretariat of the Council
To: Delegations

Subject: Proposal for a DIRECTIVE OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL amending Directive (EU) 2018/2001 of the European Parliament and of the Council, Regulation (EU) 2018/1999 of the European Parliament and of the Council and Directive 98/70/EC of the European Parliament and of the Council as regards the promotion of energy from renewable sources, and repealing Council Directive (EU) 2015/652

- 4 column document

Delegations will find attached, for information, the 4column document of the abovementioned proposal.

Proposal for a DIRECTIVE OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL amending Directive (EU) 2018/2001 of the European Parliament and of the Council, Regulation (EU) 2018/1999 of the European Parliament and of the Council and Directive 98/70/EC of the European Parliament and of the Council as regards the promotion of energy from renewable sources, and repealing Council Directive (EU) 2015/652

2021/0218(COD)

[Version for Trilogue on 6 October, 2022]

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
Recital 1a				
11a		<u><i>(1a) The energy transition affects Member States, regions, economic sectors and citizens differently and depending on their particular situation. It is therefore essential to ensure that the Green Deal is implemented in a way that promotes economic, social and territorial cohesion in the Union and that the energy transition is just and inclusive. In particular, it must be ensured that disruptions are avoided in critical sectors that meet basic needs of the economy and society, such as mobility.</i></u>		
Recital 1b				
11b		<u><i>(1b) Energy is an essential production factor that is in constant demand and vitally important in economic, social and environmental terms. All human activities, including transport, depend on sufficient and affordable energy being available when needed.</i></u>		
Recital 1c				
11c				

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<p><i><u>(1c) The General Union Environment Action Programme to 2030 (8th EAP) sets out thematic priority objectives for 2030 in the areas of climate change mitigation, adaptation to climate change, protecting and restoring biodiversity, a non-toxic circular economy, a zero pollution environment and minimising environmental pressures from production and consumption across all sectors of the economy and recognises that these objectives, which address both drivers and impacts of environmental damage, are inherently interlinked. The 8th EAP also has a long-term priority objective that by 2050 at the latest, people live well, within the planetary boundaries in a well-being economy where nothing is wasted, growth is regenerative, climate neutrality in the Union has been achieved and inequalities have been significantly reduced. A healthy environment underpins the well-being of all people and is an environment in which biodiversity is conserved, ecosystems thrive, and nature is protected and restored, leading to increased</u></i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u>resilience to climate change, weather and climate-related disasters and other environmental risks.</u>		
Recital 1d				
11d		<u>(1d) The General Union Environment Action Programme to 2030 ('8th EAP'), the framework for Union action in the field of the environment and climate, aims to accelerate the green transition to a climate-neutral, sustainable, non-toxic, resource-efficient, renewable energy-based, resilient and competitive circular economy in a just, equitable and inclusive way, and to protect, restore and improve the state of the environment by, inter alia, halting and reversing biodiversity loss. It supports and strengthens an integrated policy and implementation approach, building upon the European Green Deal. The 8th EAP recognises that achieving this transition will require systemic change which, according to the EEA, entails a fundamental, transformative and cross-cutting</u>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<p><u><i>change that implies major shifts and reorientation in system goals, incentives, technologies, social practices and norms, as well as in knowledge systems and governance approaches.</i></u></p>		
Recital 1e				
11e		<p><u><i>(1e) Ensuring that legislative initiatives, programmes, investments, projects and their implementation are consistent with, contribute where relevant, and do no harm to any of the 8th EAP objectives is necessary for the objectives' achievement. Furthermore, ensuring that social inequalities resulting from climate- and environmental-related impacts and policies are minimised and that measures taken to protect the environment and climate are carried out in a socially fair and inclusive way, as well as gender mainstreaming throughout climate and environmental policies, including by incorporating a gender perspective at all stages of the policy-making process, will be required to meet the objectives of the 8th EAP and, as such, are also</i></u></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u><i>laid down as enabling conditions in the 8th EAP.</i></u>		
Recital 1f				
11f		<u><i>(1f) The 2030 climate mitigation objective of the 8th EAP is swift and predictable reduction of greenhouse gas emissions and, at the same time, enhancement of removals by natural sinks in the Union to attain the 2030 greenhouse gas emission reduction target as laid down in Regulation (EU) 2021/1119, in line with the Union’s climate and environment objectives, whilst ensuring a just transition that leaves no one behind. To help achieve its objectives, the 8th EAP also lays down the enabling condition of phasing out of environmentally harmful subsidies, including through setting a deadline for the phasing out of fossil fuel subsidies consistent with the ambition of limiting global warming to 1,5°C as well as a binding Union framework to monitor and report on Member States’ progress towards phasing out fossil fuel subsidies, based on an agreed</i></u>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u>methodology.</u>		
Recital 1g				
11g		<u>(1g) This Directive aims to ensure that, as part of the EU's energy policy, investments in renewable energy production are encouraged while upholding the energy sovereignty of each Member State.</u>		
Recital 1h				
11h		<u>(1h) The renewable energy directive is part of the 'Fit for 55 package', which will also have multiple effects on the Union, including on competitiveness, job creation, household purchasing power, the achievement of climate targets and on the magnitude of carbon leakage. As such, a comprehensive evaluation of the aggregated macroeconomic impact of the Regulations that make up the 'Fit for 55 package' should be carried out on a regular basis.</u>		
Recital 2				
12				

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
	(2) Renewable energy plays a fundamental role in delivering the European Green Deal and for achieving climate neutrality by 2050, given that the energy sector contributes over 75% of total greenhouse gas emissions in the Union. By reducing those greenhouse gas emissions, renewable energy also contributes to tackling environmental-related challenges such as biodiversity loss.	(2) Renewable energy plays a fundamental role in delivering the European Green Deal and for achieving climate neutrality by 2050, given that the energy sector contributes over 75% of total greenhouse gas emissions in the Union. By reducing those greenhouse gas emissions, renewable energy also contributes to tackling environmental-related challenges such as biodiversity loss, <u>land, water and air pollution, as long as the use of the renewable energy sources themselves does not exacerbate those challenges. The low operating costs of renewable energy and the reduced exposure to price shocks compared to fossil fuels gives renewable energy a key role in tackling energy poverty.</u>	(2) Renewable energy plays a fundamental role in delivering the European Green Deal and for achieving climate neutrality by 2050, given that the energy sector contributes over 75% of total greenhouse gas emissions in the Union. By reducing those greenhouse gas emissions, renewable energy also contributes to tackling environmental-related challenges such as biodiversity loss.	
Recital 2a				
12a		<u>(2a) With ever more countries committing to climate-neutrality by mid-century, both domestic and global demand for renewable technologies are projected to rise and offer significant opportunities for job creation, the expansion of a European renewables industrial</u>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u><i>base and continued European leadership in research and development of innovative renewable technologies, which in turn enhance the competitive advantage of European companies and the EU's energy independence from fossil fuel imports.</i></u>		
Recital 2b				
12b		<u><i>(2b) The share of gross final energy consumption from renewable sources in EU reached 22 % in 2020¹, 2 percentage points (pp) above the target for the share of renewable energy in gross final energy consumption for 2020, as set out in Directive 2009/28/EC on the promotion of the use of energy from renewable sources.</i></u> <u><i>1.</i></u> <u><i>https://ec.europa.eu/eurostat/web/products-eurostat-news/-/ddn-20220119-1</i></u>		
Recital 2c				
12c		<u><i>(2c) Renewable energy is a key enabler of sustainable development, contributing directly</i></u>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u><i>and indirectly to many Sustainable Development Goals (SDGs), including poverty alleviation, education, water and sanitation. Renewables also bring broad socio-economic benefits, creating new jobs and fostering local industries.</i></u>		
Recital 2d				
12d		<u><i>(2d) At international level, at the 2021 United Nations Climate Change Conference (COP 26) the Commission, together with global partners, committed to end direct support for the international unabated fossil fuel energy and to use these funds for the deployment of renewable energy.</i></u>		
Recital 2e				
12e		<u><i>(2e) At COP26, the Commission together with global leaders elevated the global ambition level for the preservation and recovery of global forests, and for an accelerated transition to zero emissions transportation.</i></u>		
Recital 2f				

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
12f		<u>(2f) Renewable energy production often takes place at local level and depends on regional SMEs; Member States should therefore fully involve local and regional authorities when setting targets and supporting policy measures.</u>		
Recital 2g				
12g		<u>(2g) Since around 35 million Europeans are affected by energy poverty¹, renewable energy policies have an important role to play in any strategy to tackle energy poverty and consumer vulnerability.</u> <u>1. Commission Recommendation (EU) 2020/1563 of 14 October 2020 on energy poverty.</u>

Recital 3a				
13a		<p><u><i>(3a) In line with the Commission recommendation of 28 September 2021 entitled "On Energy Efficiency First: from principles to practice. Guidelines and examples for its implementation in decision-making in the energy</i></u></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u><i>sector and beyond", this Directive should take an integrated approach by promoting the most energy efficient renewable source for any given sector and application, as well as by promoting system efficiency, so that the least energy is required for different economic activities.</i></u>		
Recital 3b				
13b		<u><i>(3b) In line with the Commission Communication of 18 May 2022 entitled "REPowerEU Plan", boosting the production of sustainable biomethane to at least 35 bcm by 2030 is a cost-efficient path to increase the share of renewable energy and diversify EU gas supply, thereby supporting security of supply and EU climate ambitions. The Commission should develop an EU strategy to address the regulatory barriers to scale biomethane production and integration in the EU internal gas market.</i></u>		
Recital 3c				
13c		<u><i>(3c) To support the cost-effective</i></u>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<p><u>achievement of the renewable energy target and the electrification of end-use sectors, while empowering households and industries to play an active part in securing and decarbonising the EU energy system and rewarding them for that, Member States should ensure that the national regulatory framework enables the reduction of peak electricity demand through the activation of demand-side flexibility in all end-use sectors. To that end, Member States could introduce in their integrated energy and climate plans a minimum target for the reduction of peak electricity demand of at least 5 % by 2030, to increase system flexibility, in accordance with Article 4(d)(3) of Regulation (EU) 2018/1999.</u></p>		
Recital 3d				
13d		<p><u>(3d) One of the five cohesion policy objectives for the period 2021-2027 is that of a greener Europe by promoting investment in clean energy, the circular economy, climate change mitigation and sustainable transport. Cohesion policy funds</u></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<p><i><u>should therefore target preventing any increase in disparities, helping those regions bearing the heaviest transition burden, encouraging investment in infrastructure, and training workers in new technologies to ensure no one is left behind.</u></i></p>		
Recital 3e				
13e		<p><i><u>(3e) The ERDF will have to support promoting energy efficiency and a reduction in greenhouse gas emissions; promote renewable energy; the development of smart energy systems and networks, and promote sustainable, multimodal, urban mobility, in the context of the transition towards a net zero carbon economy; the ESF+ has to contribute to improvements in education and training systems necessary for the adaptation of skills and qualifications, the upskilling of all, including the labour force, the creation of new jobs in sectors related to the environment, climate, energy, the circular economy and the bioeconomy (Article 4 of the ESF+ Regulation).</u></i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
Recital 3f				
13f		<u><i>(3f) Renewable energy production has a strong local dimension. It is therefore important that the Member States fully involve local and regional authorities in the planning and implementation of national climate measures, provide direct access to funds and monitor the progress of the measures adopted. Where applicable, the Member States should incorporate local and regional contributions into national energy and climate plans.</i></u>		
Recital 3g				
13g		<u><i>(3g) Recognises the important role cohesion policy plays in contributing to helping island regions achieve climate neutrality goals, bearing in mind the additional costs connected to sectors such as energy and transport, as well as the impact of mobile technology on their energy systems, which require a level of investment for management of intermittent renewable energy</i></u>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u><i>sources that is, proportionately speaking, very high.</i></u>		
Recital 3h				
13h		<u><i>(3h) Points out that owing to their small size and isolated energy systems, the most remote island regions, just like the outermost regions, face a major challenge when it comes to energy supply as they generally rely on fossil fuel imports for electricity generation, transport and heating.</i></u>		
Recital 3i				
13i		<u><i>(3i) Considers that use of renewable energy, including tidal power, should be a priority and believes it could benefit islands substantially, bearing in mind the local communities' requirements, including preservation of the islands' traditional architecture and local habitat; calls, therefore, for support for the development of a wide range of renewable energy sources based on their geographical features; welcomes the green hydrogen programmes which islands have launched.</i></u>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
Recital 4				
14	<p>(4) There is a growing recognition of the need for alignment of bioenergy policies with the cascading principle of biomass use¹, with a view to ensuring fair access to the biomass raw material market for the development of innovative, high value-added bio-based solutions and a sustainable circular bioeconomy. When developing support schemes for bioenergy, Member States should therefore take into consideration the available sustainable supply of biomass for energy and non-energy uses and the maintenance of the national forest carbon sinks and ecosystems as well as the principles of the circular economy and the biomass cascading use, and the waste hierarchy established in Directive 2008/98/EC of the European Parliament and of the Council². For this, they should grant no support to the production of energy from saw logs, veener logs, stumps and roots and avoid promoting the use of quality roundwood for energy except in well-defined circumstances. In line</p>	<p>(4) There is a growing recognition of the need for alignment of bioenergy policies with the cascading principle of biomass use¹, with a view to ensuring fair access to the biomass raw material market for the development of innovative, high value-added bio-based solutions and a sustainable circular bioeconomy. When developing support schemes for bioenergy, Member States should therefore take into consideration the available sustainable supply of biomass for energy and non-energy uses and the maintenance of the national forest carbon sinks and ecosystems, <u>the protection of biodiversity</u> as well as the principles of the circular economy and the biomass cascading use, and the waste hierarchy established in Directive 2008/98/EC of the European Parliament and of the Council². For this <u>However</u>, they should <u>be able to</u> grant no support to <u>for</u> the production of energy from saw logs, veener logs, stumps and roots and <u>stumps or roots in the case of waste or residues</u></p>	<p>(4) There is a growing recognition of the need for alignment of to align bioenergy policies with the cascading principle of biomass use¹, with a view to ensuring fair access to the biomass raw material market for the development of innovative, high value-added bio-based solutions and a sustainable circular bioeconomy. 	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
	<p>with the cascading principle, woody biomass should be used according to its highest economic and environmental added value in the following order of priorities: 1) wood-based products, 2) extending their service life, 3) re-use, 4) recycling, 5) bio-energy and 6) disposal. Where no other use for woody biomass is economically viable or environmentally appropriate, energy recovery helps to reduce energy generation from non-renewable sources. Member States' support schemes for bioenergy should therefore be directed to such feedstocks for which little market competition exists with the material sectors, and whose sourcing is considered positive for both climate and biodiversity, in order to avoid negative incentives for unsustainable bioenergy pathways, as identified in the JRC report 'The use of woody biomass for energy production in the EU'³. On the other hand, in defining the further implications of the cascading principle, it is necessary to recognise the national specificities which guide Member States in the design of their support schemes</p> <p>Waste prevention, reuse</p>	<p><u><i>derived from the implementation of works carried out with the primary objective of nature conservation and landscape management, such as from roadsides. In any event, Member States should</i></u> avoid promoting the use of quality roundwood for energy except in well-defined circumstances, <u><i>for example wildfire prevention and salvage logging</i></u>. In line with the cascading principle, woody biomass should be used according to its highest economic and environmental added value in the following order of priorities: 1) wood-based products, 2) extending their service life, 3) re-use, 4) recycling, 5) bio-energy and 6) disposal. Where no other use for woody biomass is economically viable or environmentally appropriate, energy recovery helps to reduce energy generation from non-renewable sources. Member States' support schemes for bioenergy should therefore be directed to such feedstocks for which little market competition exists with the material sectors, and whose sourcing is considered positive for both climate and biodiversity, in order to avoid negative incentives</p>	<p>quality roundwood for energy except in well-defined circumstances. In line with the cascading principle, woody biomass should be used according to its highest economic and environmental added value in the following order of priorities: 1) wood-based products, 2) extending their service life, 3) re-use, 4) recycling, 5) bio-energy and 6) disposal. Where no other use for woody biomass is economically viable or environmentally appropriate, energy recovery helps to reduce energy generation from non-renewable sources. Member States' support schemes for bioenergy should therefore be directed to such feedstocks for which little market competition exists with the material sectors, and whose sourcing is considered positive for both climate and biodiversity, in order to avoid negative incentives for unsustainable bioenergy pathways, as identified in the JRCJRC2021 report of the Joint Research Centre entitled 'The use of woody biomass for energy production in the EU'³. On the other hand, in defining the further implications of implementing measures ensuring</p>	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
	<p>and recycling of waste should be the priority option. Member States should avoid creating support schemes which would be counter to targets on treatment of waste and which would lead to the inefficient use of recyclable waste. Moreover, in order to ensure a more efficient use of bioenergy, from 2026 on Member States should not give support anymore to electricity-only plants , unless the installations are in regions with a specific use status as regards their transition away from fossil fuels or if the installations use carbon capture and storage.</p> <p>1. The cascading principle aims to achieve resource efficiency of biomass use through prioritising biomass material use to energy use wherever possible, increasing thus the amount of biomass available within the system. In line with the cascading principle, woody biomass should be used according to its highest economic and environmental added value in the following order of priorities: 1) wood-based products, 2) extending their service life, 3) re-use, 4) recycling, 5) bio-energy and 6) disposal.</p> <p>2. Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 on waste and repealing certain Directives (OJ L 312, 22.11.2008, p. 3).</p> <p>3. https://publications.jrc.ec.europa.eu/reposit</p>	<p>for unsustainable bioenergy pathways, as identified in the JRC report ‘The use of woody biomass for energy production in the EU’³. On the other hand, in defining the further implications of the cascading principle, it is necessary to recognise the national specificities which guide Member States in the design of their support schemes Waste prevention, reuse and recycling of waste should be the priority option. Member States should avoid creating support schemes which would be counter to targets on treatment of waste and which would lead to the inefficient use of recyclable waste. Moreover, in order to ensure a more efficient use of bioenergy, from 2026 on Member States should not give support anymore to electricity-only plants , unless the installations are in regions with a specific use status as regards their transition away from fossil fuels or if the <i>installations they</i> use carbon capture and storage <u>or if the installations cannot be modified in a direction to cogeneration in exceptional justified cases upon approval by the Commission.</u></p> <p>1. The cascading principle aims to achieve</p>	<p>the application of the cascading principle, it is necessary to recognise the national specificities which guide Member States in the design of their support schemes Wasteschemes. 21a				

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
			<p>(11a) (11a) The indicative EU renewable energy share for the building sector to be reached by 2030 constitutes a necessary minimum milestone for ensuring the decarbonisation of the EU building stock by 2050 in line with [Revised EPBD]. It is key to enable a seamless, cost-effective phase out of fossil fuels from buildings to ensure their replacement with renewables as highlighted by the EU Climate Target Plan and as required by the [Revised EPBD]. The indicative share of renewable energy in the building sector complements the regulatory framework for buildings under [Revised EPBD] by ensuring that renewable energy technologies, appliances and infrastructures, including efficient district heating and cooling, are sufficiently scaled-up in a timely manner to gradually replace fossil fuels in buildings and to ensure the availability of safe and reliable renewable energy supply for nearly zero-energy buildings until 2030. The indicative renewable building share also supports the inclusion of renewable energy investment</p>	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
			<p>in long-term national building renovation strategies/[building renovation plans enabling the achievement of the goals as proposed under [revised EPBD]]. Furthermore, the indicative renewable building share provides an important additional indicator to develop efficient district heating and cooling for the purposes of decarbonising the building stock, thereby complementing both the indicative district heating and cooling target under Article 24 of this Directive and the requirement to ensure that renewable energy and waste heat and cold from efficient district heating and cooling system are available to help cover the total annual primary energy use of a new or renovated building. Finally, this indicative renewable building share is also necessary to cost-effectively ensure the delivery of the annual increases in renewable heating and cooling under Article 23, as well as the indicative average annual increase in renewable energy in district heating and cooling under Article 24.</p>

Recital 11a				
21b		<p><u><i>(11a) Following the invasion of Ukraine by Russia, the case for a rapid energy transition has never been stronger and clearer. Russia provides more than 40% of the EU's total gas consumption, which is mostly used in the building sector, which is responsible for 40% of the EU's total energy consumption. By accelerating the roll out of solar rooftops and heat pumps the EU could save significant amounts of fossil fuel imports. Frontloading such investments will further accelerate the reduction of EU dependence from external suppliers. According to REPowerEU, for 2022 alone an additional 2,5 bcm of gas could be saved by installing up to 15 TWh of rooftop solar PV systems, and an additional 12bcm by every 10 million heat pumps installed. At the same time this would be a major booster to local job markets, alone such an installation wave for solar roof tops could create up to 225.000 local jobs in the installation business¹.</i></u></p> <p><u><i>1. 			<p>clean energy transition. Distributed storage assets, such as domestic batteries and batteries of electric vehicles have the potential to offer considerable flexibility and balancing services to the grid through aggregation. In order to facilitate the development of such services, the regulatory provisions concerning connection and operation of the storage assets, such as tariffs, commitment times and connection specifications, should be designed in a way that does not hamper the potential of all storage assets, including small and mobile ones, to offer flexibility and balancing services to the system and to contribute to the further penetration of renewable electricity, in comparison with larger, stationary storage assets. In addition to the general provisions preventing market discrimination included in Regulation (EU) 2019/943 and Directive (EU) 2019/944, specific requirements should be introduced to address holistically the participation of these assets and remove any remaining barriers and obstacles to unleash the potential of such assets to help the decarbonisation of the</p>

		<p><u>investments remain concentrated in a handful of regions and countries. Regions dominated by developing and emerging countries remain consistently underrepresented, attracting only about 15 % of global investments in renewables¹. Union energy partnerships should target renewable energy generation projects, as well as supporting the development of renewable energy projects and setting legal and financial frameworks, and should include the provision of necessary technical assistance and knowledge transfer in close cooperation with the private sector. Commitments on good governance and the perspective of stable, long-term collaboration should be conditional for Union cooperation. Sustainable energy cooperation should be key priority for suitable countries under the Global Gateway Initiative.</u></p> <p><u>1. International Renewable Energy Agency (Irena)- report on global landscape of renewable energy finance 2020, page 9.</u></p>

	HAVE ADOPTED THIS DIRECTIVE:		HAVE ADOPTED THIS DIRECTIVE:	
Article 1				
59	Article 1 Amendments to Directive (EU) 2018/2001		Article 1 Amendments to Directive (EU) 2018/2001	
Article 1, first paragraph, introductory part				
60	Directive (EU) 2018/2001 is amended as follows:		Directive (EU) 2018/2001 is amended as follows:	
Article 1, first paragraph, point (1), introductory part				
61	(1) in Article 2, the second paragraph is amended as follows:		(1) in Article 2, the second paragraph is amended as follows:	
Article 1, first paragraph, point (1)(-a)				
61a			(-a) (a) point (4) is replaced by the following: ‘gross final consumption of energy’ means the energy commodities delivered for energy purposes to industry, transport, households, services including public services, agriculture,	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
			forestry and fisheries, the consumption of electricity and heat by the energy branch for electricity and heat , and losses of electricity and heat in distribution and transmission	
Article 1, first paragraph, point (1)(-a), introductory part				
61b		<u><i>(-a) point (1) is replaced by the following:</i></u>		
Article 1, first paragraph, point (1)(-a), amending provision, numbered paragraph (1)				
61c		<p>"</p> <p><u><i>1. 'energy from renewable sources' or 'renewable energy' means energy from renewable non-fossil sources, namely wind, solar (solar thermal and solar photovoltaic) and geothermal energy, osmotic energy, ambient energy, tide, wave and other ocean energy, hydropower, biomass, landfill gas, sewage treatment plant gas, and biogas;'</i></u></p> <p>"</p>		
Article 1, first paragraph, point (1)(-b), introductory part				
61d				

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u><i>(-aa) in point (16), point (c) is replaced by the following:</i></u>		
Article 1, first paragraph, point (1)(-b), amending provision, numbered paragraph (1)				
61e		" <u><i>1. '(c) the primary purpose of which is to provide environmental, economic or social community benefits, in accordance with the energy efficiency first principle, for its shareholders or members or for the local areas where it operates, rather than financial profits;'</i></u> "		
Article 1, first paragraph, point (1)(a), introductory part				
62	(a) point (36) is replaced by the following:		(a) point (36) is replaced by the following:	
Article 1, first paragraph, point (1)(a), amending provision, numbered paragraph (36)				
63	'(36) 'renewable fuels of non-biological origin' means liquid and gaseous fuels the energy content of which is derived from renewable		(36) 'renewable fuels of non-biological origin' means liquid and gaseous fuels– the energy content of which is derived from renewable sources other than biomass;'	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
	sources other than biomass;;			
Article 1, first paragraph, point (1)(b), introductory part				
64	(b) point (47) is replaced by the following:		(b) point (47) is replaced by the following:	
Article 1, first paragraph, point (1)(b), amending provision, numbered paragraph (47)				
65	‘ (47) ‘default value’ means a value derived from a typical value by the application of pre-determined factors and that may, in circumstances specified in this Directive, be used in place of an actual value;;		(47) ‘default value’ means a value derived from a typical value by the application of pre-determined factors and that may, in circumstances specified in this Directive, be used in place of an actual value;;
